

INTRODUCING THE NEW MASTERCARD DEBIT CARD WITH CHIP TECHNOLOGY

We now offer MasterCard Debit Card with chip technology for more security against fraud. The card features an embedded chip that creates a unique code for each transaction that is difficult to duplicate.

Your MasterCard will work at Merchants with or without a chip-capable terminal. You will simply insert the card in the available slot or swipe as usual. Online purchases will work the same way they did with your old card.

Your MasterCard will work at any ATM to get cash, check your balance and more.

Use your MasterCard debit card sur-charge free at most credit unions where you see the CU\$ network. You can also get cash back for no fee at most merchants.

Tri Boro now offers "My Mobile Money". This service gives you more control to how, when and where your debit card is used. Some of the features are:

- Turn your card on or off with the click of a button
- Make transfers from your savings to checking account
- Greater spending control
- Fraud protection
- Customizable alerts
- See your most recent debit card transactions as they happen
